## **DETAILED ACTION**

### ***Election/Restrictions***

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Species I, figs. 1-5,

Species II, figs. 6 and 7,

Species III, figs. 8 and 9,

Species IV, figs. 10-12,

Species V, figs. 13-15,

Species VI, figs. 16-27, and

Species VII, fig. 28

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims

are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

2. The claims are deemed to correspond to the species listed above in the following manner:

Species I, figs. 1-6, claims 2-6.

Species II, figs. 6 and 7, claims 7-12.

Species III, figs. 8 and 9, claims 13 and 14.

Species IV, figs. 10-12, claims 15-18.

Species V, figs. 13-15, claims 19-21.

Species VI, figs. 16-27, claims 22-41.

Species VII, fig. 28, claim 42-46.

The following claim(s) are generic: 1.

3. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: .

Species I, figs. 1-6, claims 2-6, a bottle with a mixing means comprising a removable adaptor having an outer cap, an inner cap, a locking groove, a first protrusion, a second protrusion, a guiding conduit, an additive container and a cover.

Species II, figs. 6 and 7, claims 7-12 a bottle with a mixing means comprising a removable adapter having a cylindrical support extending from the engagement portion at a predetermined angle, a lower blocking panel, a lower shutter ring; an additive container comprising an upper blocking space, and upper shutter ring.

Species III, figs. 8 and 9, claims 13 and 14, a bottle with a mixing means comprising an additive container having an engaging part removably combined with the mouth of the bottle.

Species IV, figs. 10-12, claims 15-18, a bottle with a mixing means comprising an adaptor having fan shaped communication holes, and an additive container fan shaped comprising drain holes

Species V, figs. 13-15, claims 19-21, a bottle with a mixing means comprising an eggshell shaped additive container; a connecting means for combining with the bottle mouth.

Species VI, figs. 16-27, claims 22-41, a bottle with a mixing means comprising an outer container and an inner container.

Species VII, fig. 28, claim 42-46, a bottle comprising a wide-mouth cup body onto which a mixing means is tightly fitted.

4. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
